

# WORKSHOPS

---

## 14:00 - 15:15 PRECISION FARMING WITH FRUIT

### **Edrean Ernst - Allesbeste**

Precision harvesting, creation of production heat maps and accurate crop measurements.

## THE USE OF INTERNET PLATFORMS THAT ARE CUSTOMISABLE TO THE USER'S NEEDS

### **Edrean Ernst - Allesbeste**

There are platforms on the Internet that make data capturing and exporting very easy. These platforms are easily implementable and mobile device friendly.

## BLOCKCHAIN AND THE VALUE CHAIN

### **Mark Buhl - Data Harvest & Avotopia**

What is the value of blockchain in agriculture? What role will technology such as artificial reality play in agriculture and the value chain.

---

15:15 - 16:00

## TEA BREAK

Please visit all the sponsors and exhibitors. Thanks to them this day remains possible.

---

16:00 - 17:30

## SCHEDULING DRIP IRRIGATION. CRITICAL MEASURES AND TECHNIQUES

### **Willem Botha - Netafim**

More farmers are changing over to drip irrigation. However, do we grasp the functioning of drip irrigation and how its scheduling really works? Without a thorough understanding of key technical elements, such as infiltration rate and how wetting works on different soil types and different application rates, we cannot schedule drip efficiently and correctly. What are these critical measurements and how do we use them to irrigate efficiently.
